

## movebox® HD FTP3 Player

New movebox® HD-FTP3-Player for high quality presentation of advertising video clips. This player allows you to play your advertising information in a crystal clear HD (High Definition) quality and it can be remotely controlled via RS 232 interface.

For the data update just change the memory card, use the network interface or setting up the FTP download server. The system supports “Multi Display Zones” and displays the movie, picture and scrolling text on the screen simultaneously.
