movebox® Platin PCB

The new movebox® Full HD solid state player “PLATIN” provide you the highest standard of performance, reliability and affordability for interactive digital signage. Create your own playlist for HD Video, mp3 Audio and JPEG files and trigger it with push buttons or sensors. No delay when the input is triggered. This movebox® solid state player loops HD Video Clips seamlessly. For the data exchange just push-in the Memory Card or use the USB Flash Drive.

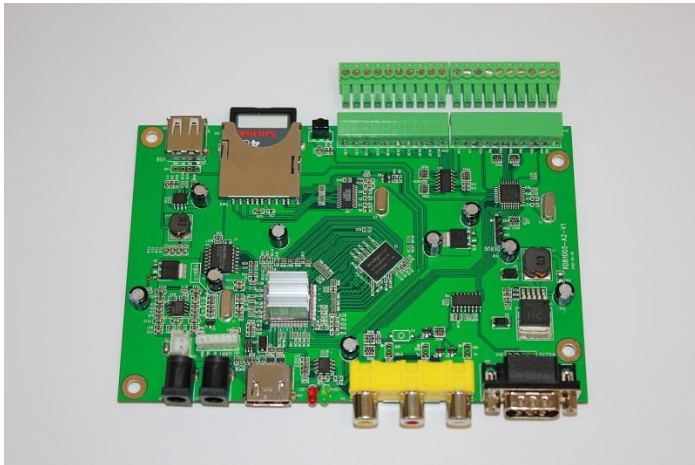

Applications: Museums (select language/showcases), interactive kiosk, sales promotion, shop window displays, superstores, Travel Agencies, Banks, Restaurants, POS, POP, POI, etc.
