

movebox® HDMI Video Player

The new movebox® HDMI Video Player offers OEM system developers and integrators a flexible and cost effective means of creating advertising solutions. For the data exchange just push-in the Memory Card or use the USB Flash Drive (Auto Download). On the parallel interface you can connect push buttons, membrane switches or motion sensors. The customer can select and play the desired information (max. 100 files).

Applications: Superstores, Shop Windows, Museums, Travel Agencies, Banks, Restaurants, POS, POP, POI, etc.
